

Road Transport Safety Policy

TotalEnergies Marketing India Private Limited (TEMIPL) is engaged in Lubricants, LPG, and Special Fluids business in India. The operation involves sourcing including imports, storage, blending, packaging, transport, distribution and marketing of products services, technical support, research and development activities, which is carried out in conformance with the Laws of the country and company' policies, procedures and guidelines.

TEMIPL is strongly committed to implementing industry best safety practices in transportation of its products.

To achieve this, we have set forth the following :

1. PATROM (Programme D'Amelioration Transport Routier Au Marketing - Program To Improve Road Transport In Marketing) protocol for high risk countries is enforced with the supporting resources to assure its implementation.
2. All transport partners are assessed for their commitment to safety prior to induction.
3. The transport partners have put in place the organizational means required for assuring safety. in line with Conformity Inspection of Transporters (ICT) guidelines.
4. The transporters are required to take a data based analytical approach for managing their crew, fleet and trips to assure compliance and take corrective as well as preventive actions as and when required /recommended.
5. Vehicles deployed/inducted for transportation meets the technical inspection criteria before induction and undergo vetting every six months.
6. All vehicles are equipped with In-cabin camera monitoring system as well as GPS enabled vehicle tracking system.
7. Drivers are imparted Defensive driving trainings regularly and the 6 safe driving themes of TotalEnergies are put into practice.
8. Journey Risk Management (JRM) is an important tool for mapping risks along all routes and consulting it is canonical before the start of any trip.
9. A well-defined security plan is implemented for the transportation of dangerous goods.
10. The transporters are frequently subjected to internal and external audits to assure conformance and compliance.
11. Regular interactions are held with the transporters to improve transport safety and trainings/ knowledge sharing sessions are conducted regularly which include REX dissemination.
12. Recognition program for both the transporters and drivers are promoted to encourage adoption of exemplary safety behaviour and build a strong HSE culture.

In addition, TEMIPL has implemented the Light Vehicle Policy, for assuring safety in the transport of their employees.
